<b>A Treatise for Energy Law</b>	<b>171</b>
Raphael J. Heffron, Anita Rønne, Joseph P. Tomain, Adrian Bradbrook & Kim Talus (2018) 'A Treatise for Energy Law', <i>Journal of World Energy Law and Business</i> , 11, 34–48. [Open Access: Creative Commons Attribution License]	
<b>Smart Cities and Smart Regulation: Accelerating Innovative Renewable Technologies in Energy Systems to Mitigate Climate Change</b>	<b>201</b>
Anita Rønne (2018) 'Smart Cities and Smart Regulation: Accelerating Innovative Renewable Technologies in Energy Systems to Mitigate Climate Change' in D. Zillman, M. Roggenkamp, L. Paddock & L. Godden (eds), <i>Energy Law and Technology: Dynamic Solutions for Energy Transitions</i> (Oxford University Press 2018), pp. 55–73.	

# Table of Contents

<b>Foreword</b>	<b>xi</b>
<b>Editors' Preface</b>	<b>xiii</b>
<b>The Legal Framework for Exploration for and Production of Oil and Natural Gas in Denmark</b>	<b>1</b>
1. Introduction	1
2. Public control of oil/natural gas activities	4
3. The model licence for the First Round	8
4. Terms relating to area and time	8
5. Financial terms	10
5.1. Miscellaneous Fees	10
5.2. Royalty	11
5.3. Pipeline Duty	12
5.4. Hydrocarbons Tax	12
5.5. Work programme	14
5.6. State participation	15
6. Landing and disposal of crude oil and natural gas	16
7. Liability	19
8. Contract or licence—orientation in the legal system	23
<b>Coal and Fuel Choices in Denmark</b>	<b>27</b>
1. Introduction	27
2. Power Generation	29
2.1. Introductory Remarks	29
2.2. Organisation	30
2.3. Legal Restrictions	31
3. District Heating	34
3.1. Introductory Remarks	34
3.2. Organisation	34
3.3. Legal Restrictions	35

4.	Supply Structure	38
4.1.	Introductory Remarks	38
4.2.	The South African Case	39
5.	Environment—a High Priority	40
6.	Concluding Remarks	41

## **Alternative Approaches to Regulatory Agency Structures and Powers: Eastern and Western Europe** **45**

1.	Introduction	45
2.	Institutions of regulation	46
3.	Regulatory reforms in Central and Eastern Europe	47
4.	The “Scandinavian” model	49
5.	Status for regulatory reforms in Central and Eastern Europe	53
6.	Advantages of an independent regulator	54
7.	Status for development of regulatory institutions in Central and Eastern Europe	55
8.	Major responsibilities of the regulator	57
9.	A good regulatory system and conclusions	58

## **The Emerging Oil and Gas Law in the Faroe Islands** **61**

1.	Introduction	61
1.1.	The Faroe Islands as a part of the Kingdom of Denmark	62
1.2.	The home rule system	63
1.3.	Legal competence in natural resources matters	65
2.	Oil and gas resources development	66
2.1.	Historical developments	66
2.2.	The administrative and regulatory authorities	68
3.	Legal framework for exploitation of oil and natural gas	69
3.1.	Hydrocarbon Activities Act	69
3.2.	The licence system	71
3.2.1.	Procedures for granting licences	71
3.2.2.	Criteria for obtaining a licence	73
3.2.3.	Issued licences	74
4.	Licence terms	75
4.1.	Terms related to area and time	75
4.2.	Work programme	76
4.3.	Faroese participation	77
4.4.	Financial terms	79
4.5.	Enforcement and dispute resolution	80
4.6.	Environmental issues	81
4.6.1.	Environmental impact assessment	82
4.6.2.	Abandonment	83
4.6.3.	Liability	83
5.	Current developments and the future	84

<b>Renewable Energy on the Market – a Danish Perspective</b>	<b>87</b>
1. Danish energy supply system	91
2. Policy developments	92
3. Development of various renewable sources	94
4. Regulatory framework for wind energy	99
4.1. Approval system for construction of wind turbines	100
4.2. Licence system for offshore wind energy	101
4.3. Financial incentives for developing renewable energy	104
5. Conclusion	106
<b>Wind Energy and the Law: A Comparative Analysis</b>	<b>109</b>
1. Development of the political and legal framework for renewables	112
1.1. International framework	112
1.2. European Community framework	115
1.3. National frameworks and wind energy developments	118
2. Regulatory challenges for the promotion of wind energy	121
2.1. Jurisdictional issues	121
2.2. Constitutional rights and other fundamental rights	124
2.3. Planning and environmental issues	130
2.4. Planning law	130
2.5. Environmental assessment	133
2.6. Nature protection and landscape interests	136
2.7. Environmental protection	137
2.8. Neighbour law and nuisance	139
3. Access to the resource, the grid and the market	140
3.1. Establishment of wind turbines	140
3.2. Market access and connection to networks	143
3.3. Price regulation and subsidies	144
4. Conclusion	148
<b>The Interface between EU Energy, Environmental and Competition Law in Denmark</b>	<b>153</b>
Introduction and the questions	154
A. Regulation and Competition Policy	154
B. Promotion and Subsidy of Renewable Energy	155
C. Climate Change	156
Security	157
The Treaty	157
FIDE 2012. Questionnaire: The Interface between Energy, Environment and Competition Rules of the European Union	158
A. Regulation and Competition Policy	158
B. Promotion and Subsidy of Renewable Energy	164
C. Climate Change	166
Security	168
The Treaty	170

<b>A Treatise for Energy Law</b>	<b>171</b>
1. Introduction	172
2. A review of what constitutes energy law	176
2.1. Assessing the literature	177
3. Energy law's seven principles	180
4. The principles of energy law explained	182
4.1. The principle of sovereignty over onshore and offshore energy resources	182
4.2. The principle of access to modern energy services	184
4.3. The principle of prudent, rational and sustainable use of natural resources	188
4.4. The principle of the protection of the environment, human health and combatting climate change	191
4.5. Energy security and reliability principle	193
4.6. Principle of resilience	195
5. Conclusion	196

<b>Smart Cities and Smart Regulation: Accelerating Innovative Renewable Technologies in Energy Systems to Mitigate Climate Change</b>	<b>201</b>
I. Introduction	201
II. Smart Cities	203
A. Climate-KIC	206
B. Smart Cities Accelerator project	207
III. Smart Regulation in General and the Process Dimension	209
A. Smart regulation at the international level	210
B. Smart regulation at the EU level	212
C. Smart regulation at the national level	216
D. The relationship to governance	217
E. Some observations	217
IV. Smart Regulation in and for the Energy Sector	218
A. Transition from fossil fuels to renewables	218
B. Barriers to further integration of renewable energy and a smart energy system	220
1. The organization of energy supply	220
2. The energy tax system	221
3. Data exchange and protection	223
C. Solutions and best practice	224
1. Multi-suppliers	224
2. One legislative framework	225
3. One market	226
V. Concluding Remarks	227
