<https://participate-sccl.se/view.php?id=464117>

**About the Event**

Financial law in the Nordic region has changed considerably in recent decades. The aftermath of the 2008 financial crisis, expanding EU regulations, and the increasing complexity of financial markets have all contributed to a legal landscape where private law principles must coexist and interact with detailed public law regulations. This volume brings together Nordic experts to explore how financial markets are shaped by evolving legal frameworks. The chapters examine key challenges in financial stability, investor protection, corporate governance, and sustainable finance. As financial markets continue to adapt to new risks and opportunities driven by economic shifts, technological developments, and changing policy priorities, this volume offers valuable insights into the legal and regulatory questions that shape the Nordic financial sector today.

Some of the contributors will briefly present their most important conclusions.

The series Scandinavian Studies in Law is published by a non-profit trust. The first volume was presented in 1957 and to date almost 1000 articles have been published in the series. Find out more at [scandinavianlaw.se](https://scandinavianlaw.se).
